DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Marttinen 4,452,383.

Marttinen teaches a strap system comprising a proximal strap 14, 19, 20, with two ends 18, 21, a distal strap 16 with two ends joined to the proximal strap, curved pads 13, 15, and adjustable buckles 22.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marttinen 4,452,383 in view of Moomaw 2,915,233.

Marttinen teaches the claimed invention except that the distal strap is joined to the proximal strap by connecting rings instead of overlapped and sewn as claimed.

Moomaw teaches a similar strap system comprising a proximal strap 10 and a distal strap 23 in which the ends of the distal strap are overlapped with the proximal strap and

sewn together. See in particular figure 1. It would have been obvious to one of ordinary skill in the art to substitute the attachment means of Moomaw for the means taught by Marttinen since both inventions teach art equivalent means for attaching distal straps to proximal straps.

Response to Arguments

5. Applicant's arguments filed January 4, 2005 have been fully considered but they are not persuasive.

6. In response to applicant's argument that the strap system of Marttinen is not worn over both shoulders by a user in the manner as claimed by applicant and therefore does not result in the strap system forming a "y" shape on the front of a user, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

As to applicants arguments directed to the specific differences in the belt system of Marttinen and the disclosed belt system of the instant invention, it is noted that it is the claims not the specification which set forth the scope and limitations of the invention. Not the specification. The claims are also given their broadest reasonable interpretation when reviewed for patentability, not the specification. In view of this, the structure as

set forth in the claims is met by the structure set forth in Marttinen as applied in claims 1-5 and 8 and as modified by Moomaw as applied in claims 6 and 7.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
